

Begin Your Career in Technical Construction Design

ACS Stainless Steel Fixings Limited is a leading design and manufacturing business supplying specialist structural building components and systems to the construction industry.

ACS believes in investing in the training and development of young talented individuals to expand our growing Technical Design Team.

An apprenticeship in construction and the built environment will provide you with the skills and knowledge you require as you begin your career as a Technical Engineer at ACS within our prestigious Technical Design Department.

During the apprenticeship you will receive on the job training and gain the qualifications you require to provide you with the technical understanding and attributes needed to become a successful member of our team.

Job Title

Technical Engineer

Job Type

Apprenticeship with a career opportunity upon completion

Key Information

Location: Leeds

Salary: TBC

Hours of work: 8.00am – 5.00pm

Job Description

The Technical Engineer produces high quality, accurate and detailed technical drawings to communicate product designs with architects, engineers and subcontractors for approval.

The role requires frequent contact with clients to ensure the products meet with their exact project requirements.

ACS projects comprise of commercial, industrial and residential buildings, including iconic projects such as football stadiums, national event centres and educational institutes.

During the apprenticeship you will work closely with the sales, specification, engineering and production teams to ensure a thorough understanding of design and manufacturing throughout the product design realisation process is gained.

The ideal candidate will demonstrate a passion for design and construction technology. Knowledge of Computer Aided Design software, in particular Auto CAD would be beneficial but will be incorporated as a key part of the training.

Candidates must have a desire to learn and develop, be self-motivated, dynamic and have excellent communication skills. A 'can-do' attitude is essential.

This is an ideal opportunity to get paid to learn the skills and gain the qualifications you will require to become a key part of this young, dynamic and exciting department within a well-established forward thinking business.

Owed to the recent success of the business, ACS have recently moved to a purpose-built facility with state of the art design and manufacturing capabilities. The new headquarters provides a modern and stylish environment to work, learn and develop. Amenities include breakout areas, canteens and a gymnasium with close by local amenities and transport links within 10 minutes of Leeds City Centre.
